

Yearly calendar for lawn bowls to be used for Morphett vale memorial bowling club greenkeepers, this will vary somewhat depending on the specific climate and weather conditions, but here's a generalized outline based on the typical seasons:

Summer (December - February):

- **Maintenance:** Undertake regular mowing, watering, and fertilizing to promote healthy growth during the warmer months.
- **Irrigation:** Monitor and adjust irrigation schedules to account for hot and dry conditions.
- **Pest and Disease Management:** Be vigilant for pests like lawn grubs and diseases that thrive in warm weather.

Autumn (March - May):

- **Renovation:** Perform renovations such as scarifying, aerating, overseeding, and topdressing to repair any wear from summer and prepare for winter dormancy.
- **Fertilization:** Apply fertilizers tailored for autumn to strengthen roots and prepare for cooler weather.
- **Weed Control:** Address any weed issues before they become more problematic.

Winter (June - August):

- **Maintenance:** Continue regular mowing and adjust mowing height as needed.
- **Irrigation:** Reduce watering frequency but ensure adequate moisture for turf health.
- **Frost Protection:** (low risk in our area) Protect the green from frost damage, especially in cooler regions.

Spring (September - November):

- **Preparation:** Prepare for the upcoming playing season with thorough aerating, overseeding, and topdressing.
- **Fertilization:** Apply spring fertilizers to encourage lush growth and prepare for increased use.
- **Pest and Disease Management:** Monitor for pests and diseases as temperatures rise.

Year-round Tasks:
